

## **FOR IMMEDIATE RELEASE**

### **JurInnov Acquires Powerful Computer Forensic Analysis Technology**

*The New Leading-Edge Investigative Tool Provides Real-Time Advanced Data Acquisition, Preservation and Analysis Capabilities with No System Downtime*

**CLEVELAND, OHIO – January 10, 2006** – JurInnov Ltd. ([www.jurinnov.com](http://www.jurinnov.com)), a consulting company that provides technology solutions for the legal and business communities, today announced the acquisition of additional computer forensic analysis technology to bolster the software toolkits used by the company's computer forensic and electronic discovery experts. This powerful new tool will allow real-time advanced data acquisition, preservation and analysis capabilities on a mobile platform that does not require system downtime to capture and preserve data in a forensic manner.

The application of the new technology has a range of benefits that will provide an immediate impact to current and prospective clients. "We are excited to provide our clients with a data harvesting solution that provides the assurance of approved forensic techniques without the typical operational disruptions and downtime associated with other utilities," stated Timothy M. Opsitnick, Senior Partner and General Counsel of JurInnov. Gregory M. Cancilla, Forensic Technical Manager and a certified computer forensics technician for JurInnov, added, "We are now able to provide an immediate response to harvesting and investigative requests without the need for advanced downtime scheduling or alerting potential targets. From one central location we can analyze workstations and servers located anywhere on the network, even remotely if project needs require it".

JurInnov, in the midst of a multi-year implementation of a software, hardware and intellectual capital growth plan, acquired this new technology to allow the company's acquisition teams to provide project specific electronic data solutions at remote, on-site and international locations. These flexible teams leverage the forensic analysis, electronic discovery, engineering and management skills of JurInnov's experts to provide law firms, corporations and vendors with the critical capture and analysis resources

required to successfully collect and manage the high volumes of electronic data associated with today's legal and regulatory proceedings.

### **About JurInnov Ltd.**

Established in the year 2000 by Timothy M. Opsitnick, JurInnov Ltd. has become a trusted resource for companies whose litigation technology needs are as varied and specialized as the companies themselves. JurInnov's consulting practice focuses on the application of technology solutions to challenging litigation demands of law firms and their clients, including the development of litigation and document management systems, document and electronic data warehousing, electronic discovery processing and consulting, electronic risk management consulting, and computer forensics. JurInnov is a certified partner of Microsoft<sup>®</sup> Corporation ([www.microsoft.com](http://www.microsoft.com)), developers of the Windows SharePoint<sup>™</sup> Portal Server, and one of the select Application Service Providers for Ringtail Casebook ([www.ringtailsolutions.com](http://www.ringtailsolutions.com)). For further information about JurInnov please call +1.440.835.3600 or visit our website at [www.jurinnov.com](http://www.jurinnov.com) .
