

## **FOR IMMEDIATE RELEASE**

### **JurInnov Now Offers Document Review Facility and Staffing Services**

*The Legal Technology Consulting Company Continues to Expand its Innovative Offerings with the Unveiling of New Document Review Facility and Staffing Services*

**CLEVELAND, OHIO – April 17, 2009– JurInnov Ltd.** ([www.jurinnov.com](http://www.jurinnov.com)), a legal technology consulting practice specializing in the management of electronically stored information (“ESI”), today announced the latest addition to its list of innovative service offerings by introducing a new document review facility and related consulting services. The review facility, located at the company’s headquarters in Cleveland, Ohio, will allow law firms and corporations in need of document review services and/or space to leverage cutting edge technology and extensive expertise to create a more efficient and cost-effective approach to document review projects.

The review facility, which is located within a portion of the new office expansion, includes a separate secure entrance and is capable of comfortably handling thirteen reviewers with additional space available for larger projects. The review room features brand new Dell computers with 22-inch screens and has a dedicated network infrastructure to guarantee high-speed connectivity and security. In addition to the new computers and equipment, the review facility includes amenities designed to make the reviewers more comfortable and effective, such as ergonomic chairs and desks, large windows, a conference room, and a projector. Finally, restaurants, theaters, sporting venues and other amenities are within easy walking distance.

While the clients may utilize any review tool, they also have the option to have JurInnov host the data and document review software as part of its Ringtail Legal On-Demand service offering. This review tool is highly customizable, easy to learn, and is capable of handling projects of any size, from small cases comprising a few gigabytes to very large projects involving multiple terabytes.

In addition to the new facility, JurInnov staff will be available to consult with the review teams. JurInnov's analytic's expert, Karl Schieneman, Esq., can take a "big picture" view of all of the data utilizing new analytical tools and subsequently recommend best practice review techniques and workflow design options. The objective is to significantly reduce the amount of documents "up front" that would need to be reviewed and more efficiently review the remaining documents.

### **About JurInnov Ltd.**

Established in the year 2000 by Timothy M. Opsitnick Esq., JurInnov Ltd. has become a trusted resource for companies whose litigation technology needs are as varied and specialized as the companies themselves. JurInnov's international consulting practice focuses on the application of technology solutions to challenging litigation demands of law firms and their clients, including the hosting and management of litigation and document management systems, electronically stored information ("ESI") consulting and processing, electronic data discovery, data harvesting, electronic risk management consulting, and computer forensics. JurInnov is a certified partner of Microsoft® Corporation (<http://www.microsoft.com/sharepoint>), developers of the Windows SharePoint™ Portal Server, and a Ringtail Legal™ ASP partner of FTI® Ringtail ([www.ftiringtail.com](http://www.ftiringtail.com)). Recently named by Cleveland Magazine as one of the Top 25 workplaces where innovation is taking place, JurInnov Ltd. continues to expand its growing team in Cleveland's Technology Corridor.
