

FOR IMMEDIATE RELEASE

JurInnov Announces the Integration of Attenex® Document Mapper™ into its Ringtail® Legal On-Demand™ Service Offering

The Legal Technology Company Expands Offerings with Introduction of Attenex Tools and Ringtail® Mines™ Electronic Discovery Software

CLEVELAND, OHIO – February 8, 2010 – JurInnov Ltd. (www.jurinnov.com), a legal technology consulting company celebrating its tenth year of providing electronic discovery services, today announced the expansion of its discovery analytics offering to include Attenex® and Ringtail® Mines™ software. Fully integrated with the Ringtail Legal On-Demand document management and review platform, Attenex and Mines use concept analytics to substantially improve the workflow and presentation of documents for legal review. With these tools, individual reviewers are assigned related documents organized by concept in a visual interface which facilitates more document decisions in less time. As a result, legal review costs, the most expensive component of electronic discovery, decrease substantially while enhancing accuracy and defensibility.

Mines can analyze document collections, large or small, and extract concepts from the data to identify similar document sets. Then, Attenex Document Mapper further refines and organizes the documents into concept “clusters” which are presented in a visual interface for legal review. Furthermore, the integration of these tools within Ringtail avoids the need to move data between multiple applications during document review. With these tools, a five to ten-fold increase in reviewer productivity is anticipated when compared to traditional linear review methods.

“The integration of Ringtail and Attenex offers JurInnov a phenomenal opportunity to provide our clients with a cutting edge tool to improve the performance, defensibility and cost-effectiveness of their litigation management and document review processes,” stated Timothy M. Opsitnick, Esq.,

Senior Partner and General Counsel of JurInnov. “In addition, JurInnov has also installed Attenex Workbench™, which will further enhance our ability to process electronic information, thereby providing our clients additional capacity and savings.”

ATTENEX, ATTENEX DOCUMENT MAPPER, ATTENEX WORKBENCH, MINES, RINGTAIL, and RINGTAIL LEGAL ON DEMAND are trademarks of FTI Consulting, Inc. and are used with permission.

About JurInnov Ltd.

Established in the year 2000 by Timothy M. Opsitnick Esq., JurInnov Ltd. has been a trusted resource for over a decade for law firms and corporations whose litigation technology needs are as varied and specialized as the organizations themselves. JurInnov’s international consulting practice focuses on the application of technology solutions to challenging litigation demands of their clients, including hosting and managing litigation and document management systems, electronically stored information (“ESI”) consulting and processing, electronic data discovery, data harvesting, electronic risk management consulting, and computer forensics.
